

Personalized insights for your prostate cancer care

Vesta Prostate Risk Stratify is an innovative tool to understand your prostate cancer more precisely, estimating the chance of cancer worsening, and how helpful it may be to add certain therapies. Having more information about what to expect that is unique to your cancer can help your doctor tailor the treatment plan that's best for you.

How Testing Works

No extra procedure.

Vesta tests use a sample of your tumor tissue already removed during routine care.

AI-powered analysis.

Our advanced AI technology analyzes deep details of your tumor sample beyond what the human eye can measure with the microscope. It complements the pathologist's review.

Actionable results.

Your doctor receives a test report with more information about your cancer to personalize your care plan.

Ask your care team whether Vesta Prostate testing could be a part of personalizing your cancer treatment plan.

Clinically Proven

The Vesta Prostate Risk Stratify biomarker was built and validated in patients from multiple pivotal clinical trials. Vesta testing has been developed, studied, and used in thousands of patients across GU cancers.

Billing Made Simple

At Valar Labs, we believe everyone deserves access to the most advanced tools in cancer care, without the fear of financial burden. That's why we've made it a top priority to ensure cost isn't a barrier to receiving Vesta testing, and our Valar Access program is available to help minimize out-of-pocket costs.

Will My Insurance Cover Vesta Testing?

Good news! Valar Labs works with all major commercial insurance plans and Medicare. We'll help navigate the process and manage any appeals on your behalf.

How Billing Works

Vesta testing ordered.

Once your doctor orders testing, we work with your care team to get your tumor sample and begin the testing process.

Insurance claim processed.

Your insurance provider reviews the claim and may send an Explanation of Benefits (EOB). This is not a bill.

Ongoing support.

Test results go to your doctor. If needed, we will appeal any insurance claims on your behalf and reach out to discuss options through the Valar Access program.

A cancer diagnosis can be overwhelming. Our patient support team is here to guide you through the billing process and provide tailored support for your financial situation — so you can focus on your health.
